

**Amendments to the Claims**

This listing of claims replaces all prior versions and listings of claims:

**Listing of Claims:**

1. (Currently amended) A self-diagnosis indication system for outputting an operation control signal from an ECU by allowing signals from respective types of sensors for detecting an operating condition of an engine and a crank pulse signal for detecting a rotation of a crankshaft to enter the ECU and outputting a startup disablement indication signal in a state that an abnormal condition of the engine is self-detected at the time of startup, the self-diagnosis indication system being characterized in that;

a startup disablement indication signal is ~~outputted~~ determined when ~~[[a]]~~ said crank pulse signal is inputted in the state that ~~an~~ said abnormal condition is self-detected.

2. (Currently amended) A self-diagnosis indication system as set forth in Claim 1, having abnormality indicating means for indicating the abnormal condition so self-detected, whereby ~~[[a]]~~ said startup disablement condition is indicated by changing indication modes of the abnormality indicating means by the startup disablement indication signal.
